## A Statement of Bros

The parent of alms are erroneously limited to polymethyl methacrylate pawder as component B. In the prosecution of the original Potent No. 6,306,966, an important and indispensable material, that is, amorphous silies was cancelled due to miscommunication between the Japanese patent firm and the applicant, so the new claims recite amorphous silies. As the Relaxue Application is to broaden the original claims, it is timely filed within two years of the issue date, that is, on October 23, 2003.

All errors corrected in this relaxed application up to the time of filing of this path/declaration arose without any decaptive intention on the part of the applicant.

I hereby claim the benefit under Title 35. United States Code §120 of any United States application(s) listed below and, insofar as the subject maner of each of the claims of this application is not disclosed in the prior United States application in the manner provided by the first paragraph of Title 35, United States Code §112, I acknowledge the duty to disclose information material to patentability as defined in Title 37, Code of Federal Regulations, §1.56 which occurred between the filing date of the prior application and the national or PCT international filing date of this application:
